

Memory Kits

Memory Kits are created for care partners to use with those who are experiencing Alzheimer's or other types of dementia, as well as information for their caregiver. Each item in the kit is designed to help stimulate conversation and spark memories between people with Alzheimer's disease, dementia, or memory loss and their care partner.

Each kit has a theme with suggested activities that are designed for the person's success. They are meant to be explored together with a caregiver, and encourage social connection, and exercise the mind.

How do I borrow them?

Anyone with a Manning Library card may borrow a kit for three weeks and returned to the Manning Library Check out desk.

We hope you enjoy these kits and find them helpful!

Memory kits were funded by:

Friends of Manning Library & Manning & District FCSS
